PRODUCT BROCHURE

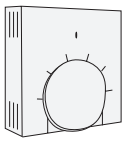
HEAT TRANSFER FAN KITS

Heat Transfer Kits are designed to draw warm air from a room with a heat source such as a fireplace or potbelly stove, and deliver this warm air to other areas of the house. They are easy to install, economical to run and are available in various kits to suit your requirement.

Features

High air velocity into rooms ensures warm air reaches the occupants. Kits include all necessary components. All three kits include a high performance 2-speed mixed-flow in-line fan, which includes plug and lead. Easy to install and economical to run.

Options



Fan Control Thermostat -

Can turnoff the fan when the room temperature goes either higher or lower than the dial setting.

Speed Controller -

Can control fan speed and turn it on and off.

One to One Room Kit
