

# idealair group

## More than just a supplier

### About Us

Idealair Group started as Ideal Rayson in Canberra back in 1979, then transitioned to The Ventilation Warehouse in 2005 with outlets in Sydney and Melbourne to service small to medium sized contractors. The addition of Tasmanian business Majorair in 2016 and the new Queensland branch in 2018 has given IAG a thorough and strong coverage along Australia's eastern states.

At Idealair Group we specialise in many product areas including heating, ventilation, air conditioning, refrigeration, energy recovery, natural ventilation, diffusion, ducting, filtration and more. Our engineered solutions are unique to each customer, as are the strong working relationships we build with each of them. We are involved with our clients' projects through every stage, offering product guidance and the best solution available. Our highly trained staff pride themselves on the quality and performance of our products and being fully invested in the success of our customers projects.
