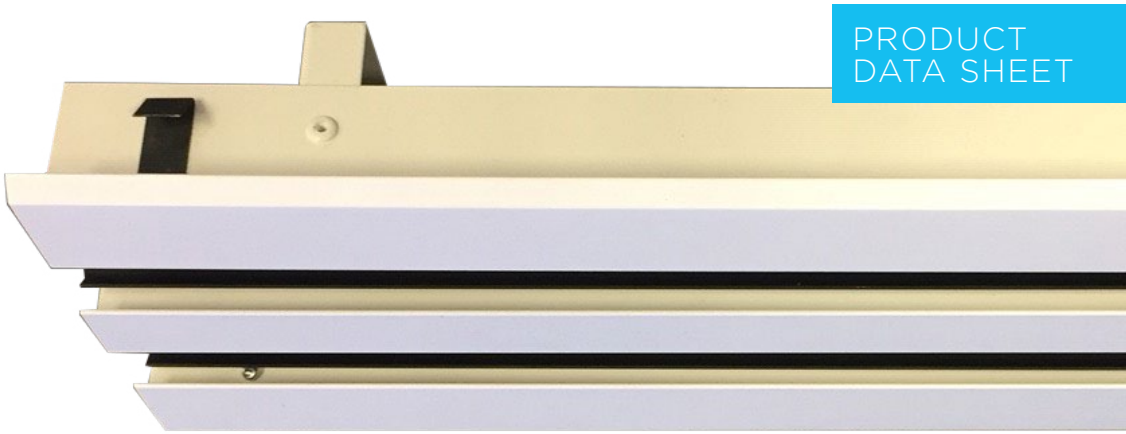
PRODUCT DATA SHEET



1 YR WARRANTY

EASYMOUNT PLASTER CEILING FRAME SYSTEM

Overview

The Easymount Ceiling Frame system is designed to be fitted to most solid ceiling systems during the plaster ceiling installation. It allows the plaster ceiling to be finished, including painting without the Linear Slot Diffuser being fitted. Fitting the Linear Slot Diffuser can be completed anytime by simply pushing into position.

Linear slot installation can be a time-consuming task, particularly in longer lengths. Using the Easymount frame into the ceiling system will provide a better standard of finish once the Linear slot is installed. Other tasks, such as installing cushion boxes, can be completed before the plaster ceiling is fitted, while access is not limited.

Product Specifications

Easymount Plaster Ceiling Frame LSD 20

ITEM CODE	NO. SLOTS	NOMINAL NECK (mm)	DIMENSION A (mm)	DIMENSION B (mm)
EML120	1	50	40	60
EML220	2	90	80	100
EML320	3	130	120	140
EML420	4	170	160	180

Easymount Plaster Ceiling Frame LSD 25

ITEM CODE	NO. SLOTS	NOMINAL NECK (mm)	DIMENSION A (mm)	DIMENSION B (mm)
EML125	1	57	47	67
EML225	2	102	92	112
EML325	3	147	137	157
EML425	4	192	182	202

Installation Instructions

The final straightness and quality appearance of the Linear Slot Diffuser is dependant on accurate fitting of the Easymount Ceiling Frame. Care must be taken when installing the Easymount Frame assembly. The Easymount Frame must be installed correctly, thereby ensuring the final fitment of the Linear Slot Diffuser is straight and aligned over the complete length. Use the joining strips to align the Easymount Frame sections.

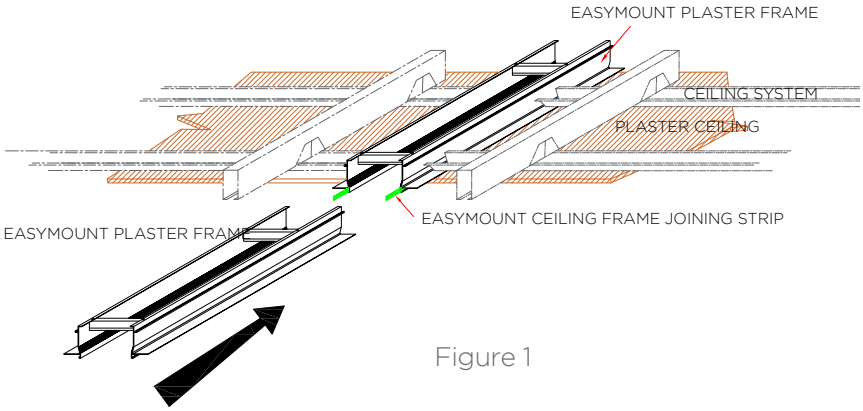

Figure 1

It is important to ensure the throat opening for the Easymount ceiling system is as per the dimension indicated on the Installation instruction sticker located on the Easymount frame. Accurately maintaining the correct opening dimension for the Easymount Frame assembly is critical for the fitment of the Linear Slot diffuser.

When fitting the Linear Slot Diffuser assemblies to the Easymount Frame, alignment and abutment of the linear slot diffuser sections (A – Figure #3) should be done before the linear slot is finally positioned (B – Figure #3) into the Easymount Frame assembly. NOTE – The Linear Slot join will be staggered to the Easymount frame join.
